MEAP: Decision

Estimate 1/3 of applications will be funded

- All applicants will receive feedback on their application
- May be invited to apply again in the future round

All Funding is Contingent
Most projects will require some revision:

- Notes from the MEAP Panel and local conditions
- Work Plan
- Budget
- Staffing
- Scope of digitization
MEAP: Funded Projects

Period of Project Refinement
- Respond to conditions on the ground (Public health, inflation, supply chain, labor)
- Respond to MEAP feedback (revised work plan, scope, hardware, other)

Process for Documentation
Need to work closely with your **HOST INSTITUTION** to register the institution to receive U.S. funding (if not in U.S.) + sign all documents
- Financial documentation
- Legal agreement

Will likely take up to **4 or 5 months** to process and complete all documentation and process payment AFTER your project is recommended for funding
MEAP: Payments

*Change to past policies

Payment profiles are as follows:

- For all projects 13 - 24 months long: 60% - 30% - 10%
  
  60% of funds will be disbursed after signing initial contract, 30% at month 12, 10% after the final report is approved

- For all projects 12 months or less: 75% - 25%:
  
  75% of funds will be disbursed after signing initial contract, 25% after the final report is approved.

The final payment is made only after the outcomes and final report from the project have been submitted and approved by the MEAP board.
TWO

Evaluation Criteria
MEAP: Evaluation Criteria

Project Applications are reviewed by UCLA Library staff, technical experts, external experts (form of peer review) and the MEAP Review Panel.

Evaluation criteria includes:

- **Endangerment** | How urgently at risk is the content?
  *Material Endangerment*
  Archival content must be imminently at-risk due to environmental conditions, political uncertainty, inherently unsustainable media, inappropriate storage, and/or communal or social change.

- **Scholarly significance** | How will the availability of this content impact research?

- **Uniqueness** | Is this material accessible elsewhere? Has it already been digitized?
MEAP: Evaluation Criteria

Viability of publishing online

- Will the UCLA Library be able to publish material online? Have you identified potential concerns or found documentation that details ownership? Have you outlined a plan to address ethical or copyright concerns?

Project Feasibility

- **Coherence of the Collection** | If you are building a new collection, is there a clear theme or connection across the different materials?

- **Work plan** | How well thought out is your work plan for survey, digitization, and metadata? Have you accounted for creating English language metadata?

- **Community Engagement** | Have you developed relationships with the local community to secure rights and document the materials?
THREE

Detailed Application
Application

- **Project Summary:** Project Administration, Project Description
- **Project Details:** Collection Details + Work Plan
- **Budget**
- **Rights + Permissions**
- **Forms + Other Uploads**
- **Referee**

Detailed Application Template (and findable here: meap.library.ucla.edu > Applicant Resources)
Revised Application

Application format and questions updated to help the MEAP team and the MEAP Panel better understand:

1. The structure of your proposed project (Host, Project Leads, Archive)
2. The goals and scope of the proposed project (ie. How many objects? How many different sites? How many different collection holders?)
3. The collection you want to survey or inventory (What is the material? Do you already have permission and access?)
4. How you will approach the project (Focus on inventory? Survey? Relationship building?)
5. How will you create robust description (Who is responsible, how much will you document?)
Project Summary
Project Summary

2 Sections: Project Administration + Project Description

PROJECT ADMINISTRATION
1. Who will be responsible for ensuring that the project is successful?
2. We want to see these pieces in place at this point in the application.

PROJECT DESCRIPTION
1. WHAT is the broad impact, goal of your project?
2. WHY is this project important?
3. NOTE: longer text blocks (most fields 500 words)
Project Administration

Project Leadership: Primary Applicant + Co-Applicants
There must be one single principal applicant who takes responsibility for the planning and execution of the project. 3 co-applicants can be added (collaborators). Co-applicants can help manage or direct the program. Primary Applicant must take responsibility for receiving all emails.

Host Institution
Should be a university, research institution, archive or similar institution to which the grant will be awarded. This institution may or may not be your home institution. The institution will administer and account for the funds. *REQUIRED: Host Commitment Form
Project Description

ABSTRACT
Broad description of your project. What is the material? Why is it important? How much of the collection will you survey? How will this initial phase of the project open up future possibilities?

Use this opportunity to make a bigger argument for impact. Why is this collection important for people outside the region or field?

ENDANGERNMENT
Reminder that we are looking to understand the MATERIAL endangerment of the collection.

OPEN ACCESS
All MEAP funded work must be published on our open access platform. This questions helps us understand how you see this aspect and your commitment to publication.
Project Abstract (max. 300 words)

In this section, summarize the details of your project. The project abstract should include: (1) What is the material? (2) What is the primary format? (3) Why is the material significant? And (4) What are some of the broader goals of digitizing this collection?

The Project Abstract should focus on the content of the collection and explain why this collection is significant. You may choose to describe how this digitization project is part of a bigger project, but the abstract should highlight the collection and what the value of digitization will be. How will this work prevent loss, preserve an important set of materials, enable representation for a community, make access for scholars, etc. In this way, the abstract should point to some of the broader impact and importance of this project.

Describe the archival material to be surveyed or digitized. (max. 500 words)

Please give a brief description of the material, including its media type(s) and why you chose this particular material. Consider: What kind of material will you document? (e.g., personal papers, videos, audio recordings, photographs, postcards, etc.). Why and where did the material come from? and what is this material significant? Be specific about both the format and the content of the material.

This value must be between 1 and 500 words. Count: 0

Describe why you have chosen this collection to preserve. (max. 500 words)

Consider: Are these materials the most rare, the most requested, the most endangered? Your response should include relevant information about why this content is at risk. This information may include details about the condition, age, physical location, storage methods, and/or political context. Material may be endangered as a result of environmental conditions, political uncertainty, inherently unsustainable media, inappropriate storage, or communal and social change.

This value must be between 1 and 500 words. Count: 0

Why is the material endangered? (max. 150 words)

Please list relevant details related to the current condition of the material and why it is at risk of loss or destruction. This may include information about the condition, age, physical location, storage, and/or political context. Material may be endangered as a result of environmental conditions, political uncertainty, inherently unsustainable media, inappropriate storage, or communal and social change.

Are these materials unique? (Max. 250 words)

Please note if these materials are unique or if they are available elsewhere (i.e., other libraries or archives). If materials have been published and are available elsewhere, please note why your collection is rare (i.e., this is the most complete collection, this is the only collection accessible to local community members).

This value must be between 1 and 300 words. Count: 0

What is the significance or value of this collection? (max. 250 words)

What is the broad thematic and cultural significance of this collection? Note here how this collection can help shape scholarly discourse or enable community members to encounter and understand their own histories. Is it of value to a local community, to a diasporic community, to scholars, teachers?

This value must be between 1 and 300 words. Count: 0

Describe the value of publishing the collection(s) on an open access platform (max. 250 words)

MEAP requires open access, online publication for all digitized materials and any inventories or surveys created through your work. How do you understand this aspect of the project in relation to your collection? Consider who has access to the collection now and how online access might make more users and deeper understanding.
PROJECT DETAILS
Project Details

1. Collection Details

What material do you plan to work with?
Asking you to detail the material - up to 3 different collections - and list where the materials are held. If the collection is not housed at your institution, the organization that currently houses and/or owns the archival material is the Archival Partner. The Archival Partner may also be a depository for a collection. Your project may have multiple Archival Partners. *Archival Partner Forms

Projects with Multiple Media Types
This is the first time this question will come up - but we ask because projects aiming to digitize multiple media types have different challenges. They are definitely allowed, we want to see that you understand the plan for working with each kind of object. **If you have AV material, will you listen/view or just inventory and assess?

Current Condition + Access of the Collection + Relocation + Digital Copies
Current and future plans for the physical material.
Project Details

Representative List
Should not be exhaustive. We want to understand what you are planning to work with. Newspapers, magazines, letters, VHS tapes. We’re trying to understand the physical material as it is now.

List of Publications
Again, should not be exhaustive. We want to understand the kinds of scholars that use your collection and how digitizing this material may help move different fields in new directions.

NEW ***POTENTIAL REVIEWERS
MEAP solicits external reviews for all applications. If you know of scholars who have used your collection materials in their scholarship - they are great potential reviewers. They can speak to why making this collection accessible is so urgent. Reviewers do not need to be familiar with digitization.
Project Details

2. Work Plan

Include as much detail as possible. We want to see how you will accomplish the project.

- How is your project structured?
  - Should include a quarter by quarter or month by month plan
  - Who will be responsible for which part of the work?
- How much material are you planning to work with?
- What scale of description are you aiming for?
- What kind of equipment will you need to do the work successfully?

See MEAP Grantee Handbook for generic work plan template (page 11)
Application questions

1. **Work Plan**
   Structured month by month or quarter by quarter. Do you need to hire a team or will you do this work on your own? Do you already have permission and access to all collection parts? Will you describe material at the collection level, box level, folder level, item level? What kind of information is most important? When and how will you engage the community?

2. **Survey or Inventory Creation**
   What will you be creating? What scale will you focus on?

3. **Specify Deliverables**
   What are the primary goals of the collection? Remember that the end result must be published online at the MEAP website. Survey, Inventory, Report, Finding Aid?
Team Makeup

No specific question - but this reflects your understanding of the full scope of the project. Your application should communicate who will take on responsibility for various aspects of the project. *Include in workplan or budget.*

- Who will do the digitization?
- Who will create the metadata?
- Where is the expertise coming from? Historical, cultural, technical...
- Will there be training?
- Will you need translation?
<table>
<thead>
<tr>
<th>STAGE</th>
<th>OBJECTIVES</th>
<th>ACTIONS</th>
<th>OUTCOMES</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Commission and coordinate project</td>
<td>• Articulate between institutions&lt;br&gt;• Set up workspace and team&lt;br&gt;• Print and buy materials and equipment</td>
<td>• Work protocols and methods established&lt;br&gt;• Report the copyright situation</td>
</tr>
<tr>
<td>2</td>
<td>Make first approach to collection</td>
<td>• Identify, delimit, and inventory the cans that conform the collection&lt;br&gt;• General inspection of the collection&lt;br&gt;• Identification of items that require urgent conservation</td>
<td>• Priority list based on endangerment and uniqueness&lt;br&gt;• Collection inventory for project purposes&lt;br&gt;• Action plan according to inventory</td>
</tr>
<tr>
<td>3</td>
<td>Inspect materials</td>
<td>• Transfer cans to the work station&lt;br&gt;• Temporary conditioning&lt;br&gt;• Technical inspection of materials</td>
<td>• Inspection sheet and specific conditions report for each can&lt;br&gt;• Content registration, specific frames with relevant content</td>
</tr>
<tr>
<td>PHASE</td>
<td>MONTH</td>
<td>ACTIONS</td>
<td></td>
</tr>
<tr>
<td>-------</td>
<td>-------</td>
<td>---------</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Preparation - Rillon’s trip to Ouagadougou</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Preparation with the host institution of the launching events (launching workshop and training days see Month 2)</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Advertising of the project within the SNEAB trade union networks and a call for archives will be launched in the trade union newspaper</td>
<td></td>

<tr>
<td></td>
<td></td>
<td>First work on filing and indexing the archives kept at the union headquarters - Identification of the copies of the union newspaper kept</td>
<td></td>
</tr>
<tr>
<td></td>
<td>1</td>
<td>Launch - Arrival of the other members of the French team in Ouagadougou (Roy, Minacour)</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>The project will begin with a workshop to launch the project (1 day) at the union’s headquarters, in which all the project partners (SNEAB, researchers, archivists, engineers) will participate; presentation of the project and its expectations, presentation of the work plan and collective drawing up of the list of union activists likely to have private archive collections</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>After this preliminary workshop, the team will organize ten days of training on collecting, processing and digitizing archives. The workshop will be led by BurkinaFaso archivists Marie Jeanne Diao (Director of the Historical and Iconographic Archives), Tony Souyémé (responsible for photographic collections), Céline Paulet (IT and digitisation archivist) and French technical staff of MINACOUR (expert in digital humanities). This training will be aimed at project members: Burkinabe and French researchers and students, and trade union activists. The workshop will alternate theoretical and practical knowledge based on the archives kept at the union’s headquarters</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Departure for Minacour after the training</td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td>Roy and Rillon will stay until the end of the month to work with the union members to establish a list of the first private archives to work on (criteria: vulnerability, urgency, interest)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>2</td>
<td>Survey + Inventory</td>
<td></td>
</tr>
<tr>
<td></td>

</tr>
<tr>
<td>-------</td>
<td>----</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
| • Rillon and Roy's trip to Ouagadougou  
• Joint work with other academic staff and local staff to systematize the results and organize a classification of the information collected.  
• Finalization of the inventory and description of the archives.  
• Organization of a study day on the SNEAB archives at the Bourse du Travail in Ouagadougou to report on the results of the project (in partnership with the SNEAB, the University of Ouaga I Joseph Ki-Zerbo, the National Centre for Scientific and Technological Research of Burkina)  
• Collective work on a broader project application.  
• Project completion and deliverables |

**Final Deliverables**

- The project team will send to UCLA Library (1) a detailed finding aid and (2) written survey report of approx. 31k to 40k print and photo items, and (3) sample digitization and metadata
**Deliverables**

*Planning Grants* have flexibility in terms of deliverables depending on your goals and the details of your collection. **The primary goal is to assess a collection and prepare for digitization.**

We would expect your project to focus on preparing the collection for digitization. ([See available templates.](#)) This might include:

- An item level inventory that documents each object
- A collection level survey that organizes a collection and determines readiness for digitization
- Rights assessment at the collection or item level

You might consider some sample digitization to establish a workflow and determine needs

- All material created through your Planning Grant (i.e. inventory, report, etc) will be published on the MEAP website
- We welcome Project Grant applications from teams funded for Planning Grants.
Budget
Budget

MEAP Budget Form should reflect the full project goals and priorities.

- How will you spend MEAP Funds?
- Will you receive funds from elsewhere to complete the project?
- Expecting to see a full accounting of the project with justification for all expenses.
- This is where we will look for equipment and staffing details. Reminder to review MEAP Project Guides for recommendations.

Digitization Project Guides findable here: https://meap.library.ucla.edu/meap-project-resources
Budget

Equipment + Staffing

We will look in this section to see what MEAP funds are supporting. If we do not see enough equipment to make the project successful we will raise questions.

- Consider: if you are assessing film, will you just assess the reels or will you want to watch the film to document the content? Do you need equipment?
  - Will this further damage the collection?
- If you have available equipment or have secured other funds to purchase equipment, include that in the equipment section.
- If you have staff that is already paid through regular salary, include that note in the salary section.
III. Budget

Payment schedules for Cohort 6 aim to address rising inflation and equipment costs. Please plan accordingly:

- For grants of 13-24 months, 60% in month 0 (before project start date), 30% in month 12, 10% after all project deliverables are submitted and final report is approved (within 3 months of project completion).

- For grants of 4-12 months: 75% in month 0, 25% after all project deliverables are submitted and final report is approved (within 3 months of project completion).

All costs within the budget must be given in USD and only eligible costs will be accepted. Consult the MSAP Program Guidelines for a full list of eligible expenses.

Note that the final payment is made only after the outcomes and final report from the project have been submitted and signed off by the Review Panel.

**Budget Summary**

2. Team Salaries

Please Note: When calculating salaries please include elements such as health or liability insurances and taxes. If necessary, these should be added to the basic salary. If you have included payments or extra duty allowances for work beyond normal job descriptions, please state this clearly. You should also state whether each position is part- or full-time. For part-time positions, please provide details of the basis on which they will be employed on the project.

Reminder: Salary expenses should reflect a commitment to local capacity-building and pay equity across all team members. Salary expenses should also be estimated according to official pay scales for the country where work will take place. Include relevant pay details here.

Please also note where a salary is a replacement salary either for teaching faculty or archivists who will be out in the field for a prolonged period.

Team Salaries Grand Total
0.00

Justification for Team Salaries

Specify here the number, rates, grades of appointment and timescale involved of all staff you intend to employ (and associated costs), including salary grades, indicate where the staff will be based.

---

C. Equipment and consumables costs

Itemized equipment and consumables

These may include cameras and consumables directly related to the project’s work. Consult MEAP resources for making hardware choices:

- [Image Project Planning Worksheet]
- [Audio Project Planning Worksheet]
- [Video Project Planning Worksheet]
- [Chart 2 of Remote Capture]

These references can help you identify the equipment and consumables you will require to capture digital files at preservation quality.

Your budget estimate should also include import/export/shipping costs for equipment. You can also include any Personal Protective Equipment (PPE) necessary to conduct work in light of coronavirus-related health and safety recommendations.

Please review the MEAP Application Guidelines for Applicants for more detailed criteria on acceptable expenses. Contact the MEAP office before submission if you have any questions.

Equipment and Consumables Grand Total

0.00

Justification for equipment and consumables

Please provide a full justification for each item of equipment listed above.
MEAP Guidelines (also findable here: meap.library.ucla.edu > Applicant Resources)
Budget: Ineligible Costs

MEAP will not fund INDIRECT COSTS. You should not list them as a line item on your budget or as components of the budget.

- Salary for people who will not be working on the project (i.e. finance team)
- Utilities or ongoing operations costs.
- We like to see that the host institution or partner institutions provide space as part of their investment.
- Some preservation materials can be included, like archival folders or boxes, but large scale infrastructure projects are not eligible. MEAP does not fund conservation projects, so these expenses should be a small part of the budget.

DISCUSS THIS WITH YOUR HOST INSTITUTION BEFORE SUBMITTING YOUR APPLICATION.
Budget: Ineligible Costs

MEAP will not fund the creation of new media (i.e. Oral Histories, Films, Documentaries, Exhibits)

- Audio recording equipment
- Video recording equipment
- Film makers or documentarians
- Curators
- Promotional materials (pamphlets, etc)
Budget: Additional Considerations

- **Budget** | MEAP funds should be focused on DOCUMENTATION. Your project may be larger than just the collection work, but we want to fund that part of the work. Consider how you budget for salaries, training, workshops that focus on the creation of inventories or surveys as part of a longer plan towards digitization.

- **Travel Plans** | We recommend minimizing funds meant to support travel for U.S. or European based researchers. Can the funds go to the team on the ground?

- **Project Team Makeup** | Who will do the work? Are there opportunities for training beyond the project team?

- **Disbursal Calendar** | We do not disburse all funds up front. Will you be able to purchase the equipment you need and pay the staff with the first disbursal?
Budget: Additional Considerations

Community Engagement

- **Website Development**
  “Website costs should represent only a small percentage of the total grant amount and should not extend beyond the length of the grant.” ([MEAP Guidelines](#), 4.1.5)

  *Remember that online publication and digital preservation are part of what UCLA provides in the grant.*
  *UCLA publishes with multi-lingual metadata.*

- **Public events or focused efforts to engage a local community:**
  “Disseminating the results from the project, such as conference talks or public/educational displays, especially where they are aimed at informing local people.” ([MEAP Guidelines](#), 4.1.5)
  - Events should focus on (1) rights or (2) documentation (metadata creation).
  - Unlikely to fund events that are strictly promotional.
Budget Form:

Have you applied for other funding?
Rights and Permissions
All MEAP content must be shared openly online: Survey, Inventory, Digital Images, Audio files, Video

- **Copyright** | Contemporary materials will likely be under copyright. Copyright ownership for the recording may not cover ownership of underlying content (i.e. a song recorded at a concert)

- **Privacy + Ethics** | Collections that document individuals, especially photos and videos must account for individual consent and permission
Rights + Permissions

**Planning Grants** - Rights and Permissions should be built into your work plan if you have not secured them. If you have material from many creators and many owners, this may be a complicated process. Use the Planning Grant to procure the necessary permissions.

- You will not need to submit a [Copyright Permission Agreement](#).
- Might want to consider submitting signed forms as a deliverable if you intend to digitize in the future.
Rights + Permissions

COPYRIGHT: You will need to secure permissions before we can fund the project. You don’t need to have all questions answered, but your answers in this section can help our team assess what kind of support you would need and the risk involved in your project.

- Require a signed Copyright Permission Agreement to move forward with funding.
- Recognize that the archival stewards or content holders may not own the copyright. Will need permission from copyright owners to make material openly accessible.
MODERN ENDANGERED ARCHIVES PROGRAM (MEAP) COPYRIGHT PERMISSION AGREEMENT

MEAP APPLICATION DETAILS

Rights + Permissions

ETHICAL RIGHTS: No clear legal framework for securing rights and navigating privacy concerns. We want to know how you plan to approach this question if it’s relevant.

- Especially important for collections of graphic images; images of children; communal materials.
- Urge you to consider how your content creators or related communities will be best informed to make meaningful decisions about permissions.
- Consider models of ongoing consent.
A. Copyright Status of Material

Who was the creator of the material?

Where was the material created?

When was the material created?

Who is the copyright owner of the material?

Share with us the name or contact information of the copyright holder

If available, share additional copyright related evidence.

Has the material been published and/or distributed to the public?

B. Privacy and Ethical Access

Is there personal or sensitive information in the collection?
This might include personal details, political activism and engagement, images of people, or violent or sensitive images.

- Yes
- No

Have you conferred with community members depicted in any of the proposed collections?

Detail a plan to engage the community related to the collection to seek permission or discuss the consequences of making material available online.

Describe any additional copyright issues and your plan to address copyright risk.
Forms and Other Uploads
Permissions

Host Commitment Form

- This form is required for all projects and should be used to confirm institutional agreement to serve as a Host Institution.

Archival Partner Form

- Commitment form for your archival partner. If you have more than one, you’ll need more than one form.

Copyright Permission Agreement

- Commitment form for copyright owner for UCLA Library to publish and steward digital surrogates of the collection. Required for all Project Grants.
- FAQ: Should the Agreement detail each item to be digitized or would the overview we provided in our preliminary application suffice?
The Grant of Permission Form is required for all Project Grant applications. The Archival Partner Form is required for all Project Grants and Planning Grants where the content is located at an institution other than the Host Institution or will be deposited at an institution other than the Host Institution. The Host Agreement Form is required for all applicants at the Detailed Stage.

**Copyright Permission Agreement**

Copyright Permission Agreements are required for all Project Grants. Project teams are responsible for identifying the creator and...

**Archival Partner Form**

The Archival Partner Form is used to confirm collaboration between the project team and the archival owners. The form should be signed by the current collection holders.

**Host Commitment Form**

The Host Commitment Form is required for all projects and should be used to confirm institutional agreement to serve as a Host Institution.

Both findable here: meap.library.ucla.edu > Applicant Resources
Upload

Documents to be included in application must be uploaded in system:

- CV’s for all Project Applicants - Prefer short versions (2 pages)
- Archival Partner Form (if necessary) - Can also reflect project commitment through letter, emails.
- Copyright Permission Agreement (Required for Project Grants) - Can also reflect permission to publish through letters from copyright owners.
- Host Commitment Form (Required for all projects)
- Supporting images and videos - Recommend only a handful (2 - 5 images). Can be the same from Preliminary Application. MEAP Board does not see Preliminary App.
- Supporting Documents - Expert involved in training; Local partner; Proof of other funding; Timeline for project planning
Referee

Applications require ONE Referee Report.

- Referee MUST register with Survey Monkey and complete report online by Feb 23, 2024.
- You are responsible for ensuring that your Referee Report is completed.

If your referee cannot register with Survey Monkey or submit the report online, please email meap@library.ucla.edu to discuss alternatives.
Referee Reports

The referee should be someone who can speak to the urgency of your project and your ability to complete the work. Someone who does not work at the archival institution or someone who would benefit from the grant.

- Can the referee address questions about the collection? Are they familiar with this content?
- Do they know you and your work?

Referees will be asked:

- Are these materials endangered?
- Are the materials currently accessible?
- What is the scholarly significance of the material?
- What is the cultural significance of the material?
- Please comment on the expertise and experience of the applicant(s) to accomplish the work involved in the project

See MEAP Detailed Application Template for more info.
Referee Form

REFeree REPORT FORM

1. Referee details

Name

Email

Position Held

Affiliated institution

Relationship to Applicant

2. Referee comments

As a referee, you are invited to provide comments on the application on each of the areas listed below. Further information on the Modern Endangered Archives Program can be found on the website: meap.library.ucla.edu

Below you will see details from the applicant’s completed application related to the categories for review. If you would like to see a full application form, please contact the applicant directly.

Are these materials endangered?
Describe the urgency to safeguard the context of the application material.

Are the materials currently accessible?
Please note if researchers are able to see the materials or if they are already available online.

What is the scholarly significance of the material?
Please describe its relevance to a particular field of study.

What is the cultural significance of the material?
Please describe its relevance to the local community, broader national community, or other group. Are there people who will benefit from access to the materials who do not currently have access?

Please comment on the expertise and experience of the applicant(s) to accomplish the work involved in the project.

Please provide any additional comments.
You are allowed to make changes to the project scope and plan. We hope your thinking has moved forward and we encourage you to make changes in your application – even when the content has been pre-populated from your preliminary application.

- Can add or take out archival collections
  *Consider a realistic scope + program eligibility*
- Can change budget items and should add specificity
- Can change participants or add a co-primary applicant
- Can change host institution or archival partners
- We recommend you **do not change the entire scope** of the project. Contact meap@library.ucla.edu if you plan to do so.
Language Requirements: English

Referee Reports must be submitted in English

- In order for all of the MEAP Review Board members to review application materials, we ask that all applications be submitted in English. This includes the Referee Report.

Deliverables must also be submitted in English

- Your survey or inventory should also be in English. We can accept inventory details in local language if you submit introduction or summary (report, context) in English.
Listing Other Grant Funds

Help us understand your overall goals

- Be sure to list other grants you have applied for that may duplicate work you proposed to do with MEAP funding.
- But! We would also love to see other grants you may have applied for that complement the work proposed. For example, maybe you had a grant for preservation and conservation that allowed you to prep the collection for digitization. Maybe you have a grant for exhibits or publications that will promote or make use of the digitized collection. These do not hinder your success in our review process; they help us see your broader ambitions for the archival material.

Required for archives applying from EU countries.
Templates for Planning Grants

MEAP Planning Grant Templates

- Template for SURVEY creation (Collection or Box level)
- Template for INVENTORY creation (Item level)

Additional Resources

- Guide for archival processing (University of Florida)
- What is a Finding Aid? (University of Colorado)
File Types + Metadata Template

Consult the [MEAP project guides](#) to understand required standards.

All files must be **uncompressed**:

- Images – TIFF
- Audio – WAV
- Film and Video - Motion JPEG 2000; MPEG-4

Metadata must be in English + formatted re: UCLA Library Metadata Template

Check out other metadata resources:

- [Metadata Template](#) (Required for Project Grants)
- [Metadata FAQ](#)
- [How does Metadata work for MEAP?](#) [Infographic]
- [MEAP Metadata Template Walkthrough](#) [Interactive]
- [Guide for File naming + Formatting](#)
- [Metadata Video](#) [New]
Multiple forms of content in one archive?

Project Grant applications should have a clear sense of what is in a collection.

Address the complexities of digitizing different kinds of content.

- Account for the differences in digitization. Will you have equipment for digitizing documents, film, video, audio? Do you have expertise on the team?
- Consider scoping your project to focus on one content type.
- Budget for necessary training and equipment.
- Consider which parts of the workflow might run parallel.
Equipment Planning + Budgeting

MEAP Project Planning Guides include HARDWARE + SOFTWARE LISTS

- Planning a Print (flat object) Digitization Project
- Planning an Audio Digitization Project
- Planning a Video Digitization Project

Scanners v. Cameras

- You are not required to purchase equipment listed in MEAP guides, but we expect to see justification for choosing other models (e.g. better local availability).
- MEAP does not fund overhead book scanners.
- MEAP recommends camera + lighting set ups rather than scanners for print digitization. Cameras are more flexible (can digitize all sizes) and more efficient. If you think a flatbed scanner is best for your team, you will have to justify why in the budget justification.
Oral Histories

MEAP cannot fund the creation of new ORAL HISTORIES.

- Do not add audio capture hardware to the budget
- Do not add time in your work plan for transcription or audio annotation

However! MEAP can fund the creation of robust metadata.

- Consider working with project stakeholders to capture contextual details about the collection objects
- Capture memories in structured metadata through abstract and notes
- Consider hosting community events that may allow more community members to discuss and explain unknown materials
Outsourcing

Outsourcing digitization is possible

- Outsourcing costs for digitization can be included in your budget.

- We will still want to see some kind of capacity building:
  - If you plan to outsource most (or all) of the digitization, make sure to budget and describe who will be responsible for metadata creation and how this work will build local capacity.
  - If you plan to outsource one part of a larger collection, we would expect that a local team does the digitization and metadata for other parts of the digitization effort.

- Outsourcing often makes most sense if you have a small number of audio or video objects to digitize as part of a larger collection of print, photographs, or other material.
Questions and Answers
Updates + Changes

Can you make changes to your application between the Preliminary and Detailed Phases?

- Yes! We welcome changes between application phases - especially those that respond to our feedback. You are also welcome to change from a Planning Grant to a Project Grant, or from a Project Grant to a Planning Grant.

Can you make changes to your budget / work plan if your project is funded?

- Yes! We anticipate that most projects will make changes to the project plan and budget during the pre-funding phase AND during the lifecycle of the project.
- Changes are approved either through the regular reporting schedule or through an email request.
Referee

Can a professor who works for the host institution serve as a referee?

- If a professor works in a different unit from the collection, then it would be okay for that professor to serve as the referee. However, if the professor is part of the project team or in any way benefits from the grant, then they should not be the referee.
- In general, we recommend identifying faculty, researchers, or community members who are not from the same institution to speak to the need for funds.
